“

*The durable instruments that are free to use in public spaces make the gift of music accessible to the community.*

”

Mayor Stephanie Miner, Syracuse, NY

Outdoor music transforms spaces, sparks imagination, and brings people together. At the heart of every Percussion Play instrument is a small, passionate team pouring energy, creativity, and expertise into creating inspiring musical moments - from the first conversation to long after installation.

We guide each project with care and expertise, helping customers turn ideas into vibrant musical destinations. We offer the world's largest and most diverse range of outdoor musical instruments, spanning chimes, bells, drums, aerophones, guiros, tongue drums, xylophones, and more.

Each instrument has its own character, with designs ranging from colorful, nature-inspired sculptures to sleek, contemporary pieces suited to urban environments. Drawing on musical traditions from around the globe, our collection provides endless possibilities for every kind of space.

31,000+ Instruments

12,000+ Locations

Sound quality remains central to our work. Every note is precision-tuned and rigorously tested to ensure a pure, resonant tone - often imitated but never matched.

We continually refine our range based on customer insight, creating instruments that complement pollinator gardens, sensory paths, inclusive playgrounds, senior living settings, and therapeutic environments.

Our commitment to inclusivity drives every design. We don't simply "accommodate" additional needs; we research, collaborate, and learn. Partnerships with organizations such as the Royal Society for Blind Children and dementia-care specialists help us design instruments that exceed expectations for accessibility, engagement, and meaningful play.

We also produce in-width white papers that explore the benefits of music and inclusive outdoor play, offering research-based insight and inspiration for specific settings and user groups.

*"One of our dementia residents has difficulty lifting one arm but when he starts to play the outdoor xylophone he can lift it higher and higher. The effect can be seen after just a few minutes!"*

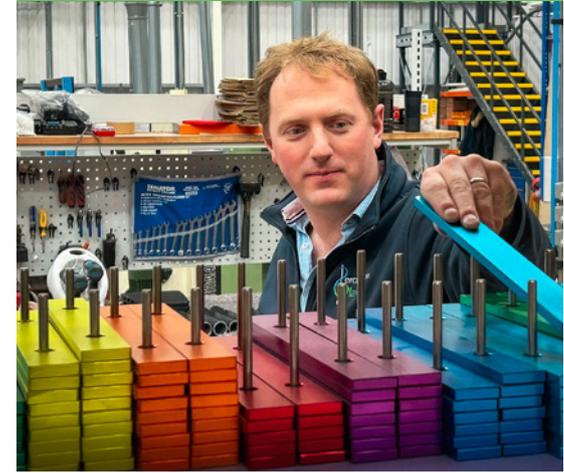

Aaars Elder Center

### Major Dementia Research Project

### Quality Materials, Superior Sound

### Blind & Visually Impaired Research Project

## Royal Honors & Awards

Durability and playability guide every design decision, ensuring each instrument is enjoyable to play and built for long-term outdoor use. Our global approach has helped open outdoor percussion to the wider world - recognized through both the Queen's Award and the King's Award for Enterprise in International Trade.

Wherever people gather - parks, schools, gardens, trails, visitor attractions, or community spaces - our instruments bring color, connection, and joy. We create products designed to inspire, to be inclusive, and to last.

# Learning Environments

For schools, early years settings, libraries, and camps that bring learning to life beyond the classroom

Outdoor music enriches learning environments by supporting creativity, curiosity, and hands-on exploration. In early years settings, it encourages sensory play, fine and gross motor development, and early musical understanding. In elementary schools, libraries, and museums, outdoor instruments extend STEAM (science, technology, engineering, art, and mathematics) learning into nature - helping students investigate rhythm, pattern, sound waves, and collaboration in practical, engaging ways.

Camps and activity centers benefit from durable, intuitive instruments that foster teamwork, confidence, and group discovery. Whether part of a formal curriculum, enrichment program, or open play, our instruments help educators create environments where learning feels natural, joyful, and inclusive - transforming outdoor areas into lively extensions of the classroom where every learner can participate.

## Inclusive Play Spaces

Where every child can play, explore, and belong

Our instruments support truly inclusive play by offering accessible, intuitive experiences that invite everyone to participate confidently. With varied tones, easy to grip mallets, and sensory-rich materials, they encourage exploration, motor development, and positive social interaction.

Their open-ended, non-competitive nature helps children and adults connect through shared discovery, while providing a calming, expressive outlet for neurodivergent individuals or those with additional needs.

Whether placed in sensory gardens, accessible playgrounds, or community recreation areas, the instruments create welcoming environments where all users can engage, communicate, and feel included.

## Public Spaces & Parks

Music that brings public spaces to life

Outdoor musical instruments introduce moments of creativity and connection into public spaces, offering simple, joyful interaction for people of all ages. They enrich parks, trails, and plazas by adding playful, sensory experiences along pathways and gathering areas, making everyday environments feel more welcoming and inclusive. Intuitive and built for long-term public use, the instruments encourage curiosity and spontaneous engagement in both vibrant urban locations and quieter natural settings.

Whether part of a community project or placemaking initiative, they spark connection and help shape public spaces where people feel inspired to pause, explore, and play.

## Health & Wellbeing Environments

Sound that soothes, supports, and restores

In therapeutic and healthcare settings, outdoor musical instruments offer soothing, accessible ways to support relaxation, rehabilitation, and emotional balance.

Their gentle tones create moments of calm for patients, residents, families, and caregivers, while music therapy sessions use them to encourage expression, movement, and sensory engagement. Hospitals and rehabilitation centers incorporate the instruments into activities that build coordination and rhythm, and therapy gardens use them to promote mindfulness and focus. Whether integrated into pathways or dedicated wellbeing spaces, the instruments help create environments that feel nurturing, grounding, and restorative.

## Senior Living & Multigenerational Spaces

Creating moments of memory, movement, and connection

Outdoor music brings meaningful opportunities for creativity, memory, and gentle movement to senior living communities. Easy to approach and intuitive to play, the instruments support participation for individuals with mobility challenges, visual impairment, or cognitive decline.

They enhance music therapy and reminiscence activities, helping spark recognition and encourage expressive engagement. Families and visitors naturally join in, creating uplifting moments that strengthen multigenerational connection.

Installed in courtyards, memory care gardens, or shared outdoor spaces, the instruments help create environments where older adults feel engaged, valued, and connected to others.

# Family & Visitor Attractions

Bringing rhythm, discovery, and delight to every visit

Outdoor musical instruments add interactivity, color, and a sense of discovery to destinations such as gardens, zoos, museums, and trails.

Simple to play and appealing to all ages, they invite families and groups to explore sound together, creating memorable shared experiences.

With no large safety zones required, they fit seamlessly into paths, courtyards, themed areas, and compact outdoor spaces. Designed for durability and high visitor throughput, they complement exhibits and enhance outdoor journeys.

Whether a standalone feature or part of a curated route, the instruments bring rhythm, movement, and creative energy to every attraction.

# Butterfly

C Major Diatonic Scale (C6-C7)  
 Arranged in pairs of Parallel Fifths

NEW  
 FOR  
 2026

The Butterfly is a vibrant outdoor musical sculpture celebrating the importance of pollinators. Inspired by the Monarch, its four wings each conceal a pair of bells arranged in parallel fifths, creating eight notes forming a clear diatonic scale from C6 to C7.

Players simply press the wings to produce bright, effortless tones - no mallets required. Ideal for gardens, parks, libraries, and educational spaces, it offers a joyful blend of art, music, and environmental storytelling.

#PP-BUTT  
 Weight 16kg / 35lbs  
 Length 82cm / 32in  
 Width 36cm / 36in  
 Height 85cm / 34in

This colorful, nature-inspired instrument sparks curiosity and creativity in young learners. Ideal for early years settings, libraries, and family attractions, its durable, easy-to-play design encourages sensory exploration and musical confidence.

Perched on a green leaf, the Ladybug invites children to press any of its six black spots, which together create a C-major pentatonic scale - perfect for intuitive, hands-on rhythm and melody play.

 Width 68cm / 27in  
 Height 144cm / 56in

The Dragonfly is a colorful, nature-inspired instrument that encourages musical exploration, vertical play, and hand-eye coordination.

Players use the attached mallet to strike 13 aluminum bells tuned to a chromatic scale from G5 to G6, with black bells marking sharps and flats. Its bright, inclusive design invites curious players of all ages to enjoy clear, characterful tones in parks, gardens, libraries, and learning environments.

The Firefly brings color, sound, and movement to outdoor spaces, inviting players to reach up, aim, and create gentle melodies with the attached mallets.

Its striking red and black HPL body and transparent etched wings offer strong visual appeal, while five green aluminum bells tuned to an A-minor pentatonic scale provide harmonious tones. Welcoming for all ages, it suits parks, gardens, libraries, and sensory-rich play and learning spaces.

# Toadstool

C Major Diatonic Scale (C6-C7)

NEW  
FOR  
2026

The Toadstool adds a touch of woodland charm to any outdoor space. It's vibrant cap features eight tactile buttons that activate bright, resonant bells - no mallets needed.

Tuned to a C major diatonic scale, it supports sensory exploration, early musical development, and intuitive, hands-on play for all ages.

Built from a durable rotomoulded cap and stainless steel post, it's a playful addition to parks, playgrounds, and sensory gardens.

#PP-TOAD

Cattails echo the tall marsh plants found along wetlands and waterways, making them a fitting musical feature for nature trails, parks, and woodland paths.

Stainless steel stems support three or six light-bronze, cylindrical anodized aluminum chimes, which produce tranquil, harmonic tones when struck with the attached soft green mallets. Durable and visually striking, Cattails bring gentle sound and natural character to any outdoor setting.

The forest-inspired Sylvan Bell-Tree Trio - Short, Tall, and Grande - creates an uplifting soundscape of ascending notes in rich green tones.

Tuned to complementary diatonic and pentatonic scales, the trio is welcoming for all ages, encouraging shared play and musical discovery. Built with stainless steel posts and durable, weatherproof bells, it's a versatile choice for parks, playgrounds, sensory gardens, and community areas. Install as a trio or individually to suit your space.

 Height 98cm / 39in

Small Babel Drum is our most compact stainless steel tongue drum, featuring six notes tuned to a C-major pentatonic scale.

Played with the hands, it produces warm, clear tones that respond easily to gentle touch, making it approachable for all ages. Its intuitive layout encourages simple melodic patterns without prior musical experience. A soft mallet is available for those who prefer or require an alternative playing method.

McClaren Park

Large Babel Drum delivers a deeper, more resonant voice through its eight-note stainless steel design. Known for its rich sustain and meditative tone, it invites slow exploration as well as rhythmic improvisation.

Played with the hands, it is accessible to beginners yet satisfying for more confident musicians. Built for permanent outdoor use, it offers durable, low-maintenance performance in public, educational, and therapeutic settings.

Cajons are durable stainless steel box drums designed for outdoor use. Played by hand, they offer intuitive rhythms, clear tones, and dependable year-round performance.

The Cajon is a stainless steel resonating box with an etched playing surface and an internal snare that responds to different striking areas. Players can create crisp high notes near the top and fuller bass tones in the centre, making it easy to explore varied rhythms. Strong, stable, and low-maintenance, it performs reliably in urban and public settings and can also double as informal seating when not in use.

## Cajon Deluxe

The Cajon Deluxe offers the same stainless steel sound box as the standard model, but features a thick solid hardwood seat for added comfort. The combination of the warm tactile surface and the instrument's built-in snare makes it ideal for longer sessions or sunny, high-use locations.

## Cajon Drum Circle (set of three)

The Cajon Drum Circle combines three stainless steel Cajons to create a welcoming space for group rhythm-making. Each drum produces crisp high tones and deeper bass notes, allowing players to build patterns together and respond to one another's rhythms. Easy to play and suited to users of all ages, the set is durable, low-maintenance, and ideal for public installations, schools, parks, and inclusive music-making activities.

 Width 30cm / 12in  
 Height 85cm / 33in

Tumbadoras feature two stainless steel tumba drums mounted on a single, stable stand, offering a comfortable and intuitive playing position.

Each drum produces deep, resonant bass tones alongside sharper, higher-pitched slaps, giving players a broad expressive range. Contemporary, durable, and low-maintenance, they provide a robust rhythmic option suitable for users of all ages and abilities.

Djembes are supplied as a set of three stainless steel goblet-shaped drums, each designed for playing with the hands to produce a wide palette of tones.

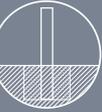

Striking different areas of the large drumheads creates everything from low, rounded bass notes to bright high accents. Responsive, robust, and visually contemporary, these Djembes perform reliably in urban settings and other busy public installations.

Bright, vibrant, and instantly uplifting, our Calypso Chimes bring a joyful carnival feel to any outdoor space. Made from UV-stable anodized aluminum and individually mounted stainless steel posts, each chime delivers a clear, resonant tone with long sustain. Available in Diatonic, Pentatonic, or Quartet arrangements within the C-major scale, they offer harmonious, accessible play for all ages, complete with a reliable mallet and holder.

Bringing the lively look of our Calypso Chimes together in one compact design, the Calypso Quatro Post features four rainbow-colored anodized aluminum chimes mounted to a durable stainless steel post. Each chime produces a clear tone with long sustain. Complete with attached mallets and holders, the Quatro Post offers an attractive, space-efficient alternative to individually installed chimes - streamlining installation and saving space.

# Penta Post

C Major Pentatonic (C5-C6)

Small, compact, and instantly appealing, the Penta Post features five rainbow-colored anodized chimes clustered around a single stainless steel post.

Tuned to the pentatonic scale, it's an ideal musical stop for preschools and early-years settings, encouraging creativity and supporting hand-eye coordination through vertical play. Pair with the Rainbow Trio Ensemble (see page 77) to add a playful extension to early-years music-making.

Children's Museum of the East End

Colorful and approachable, our Rainbow Bongos are a fun way to introduce young children to rhythm and drumming.

These compact, space-saving drums can be securely fixed to the ground, a wall, or a solid surface, making them practical for both indoor and outdoor use. Ideal for early-years play and equally popular in parks, visitor attractions, and family spaces, they're available individually or as part of the well-known Rainbow Trio Ensemble (see page 77).

# Rainbow Chimes

C Major Pentatonic (C5-C6)

Bright and cheerful, our Rainbow Chimes spark musical curiosity in young children. Tuned to harmonious pentatonic notes, they support early rhythm, coordination, and imaginative exploration through accessible vertical play. Although designed with early-years settings in mind, their friendly aesthetic has made them equally popular in multigenerational and family-focused spaces. They're also a key component of our Rainbow Trio Ensemble.

Colorful and expressive, the Rainbow Metallophone provides a gentle, welcoming introduction to melody and musical play. Tuned to the pentatonic scale - so every note works together - it delivers the same pure tone as our larger outdoor xylophones. Ideal for strengthening rhythm, coordination, and fine motor skills, this compact instrument encourages children to experiment and create. Its flexible installation options ensure it performs beautifully in indoor or outdoor environments. This instrument is part of the well-known Rainbow Trio Ensemble (see page 77).

#PP-CAVA-HD

Weight 27kg / 60lbs

Length 75cm / 30in

Width 55cm / 22in

Height 94cm / 37in

The Rainbow Cavatina is an eye-catching xylophone, known for its vibrant rainbow appearance and bright, resonant sound. Tuned to a two-octave C-major range (C4-C6), it offers clear melodic expression suited to both

beginners and experienced players.

Its anodized aluminum notes follow our Rainbow Scale, allowing it to pair effortlessly with our Music Books so players can follow the colored notes. Designed for outdoor performance, the Cavatina delivers crisp projection and an engaging musical experience.

Designed as a permanent outdoor companion to the Cavatina and Capella, our Music Books use the same vibrant Rainbow Scale for clear visual guidance.

The colored notes on the instruments match the score on the durable laminated sheets, so users simply follow the colors to play familiar tunes.

With a choice of two-sheet (four-song) or four-sheet (eight-song) versions, they offer a fun introduction to reading music and developing confidence with notation.

#PP-CAPE

Weight 45kg / 99lbs

Length 76cm / 30in

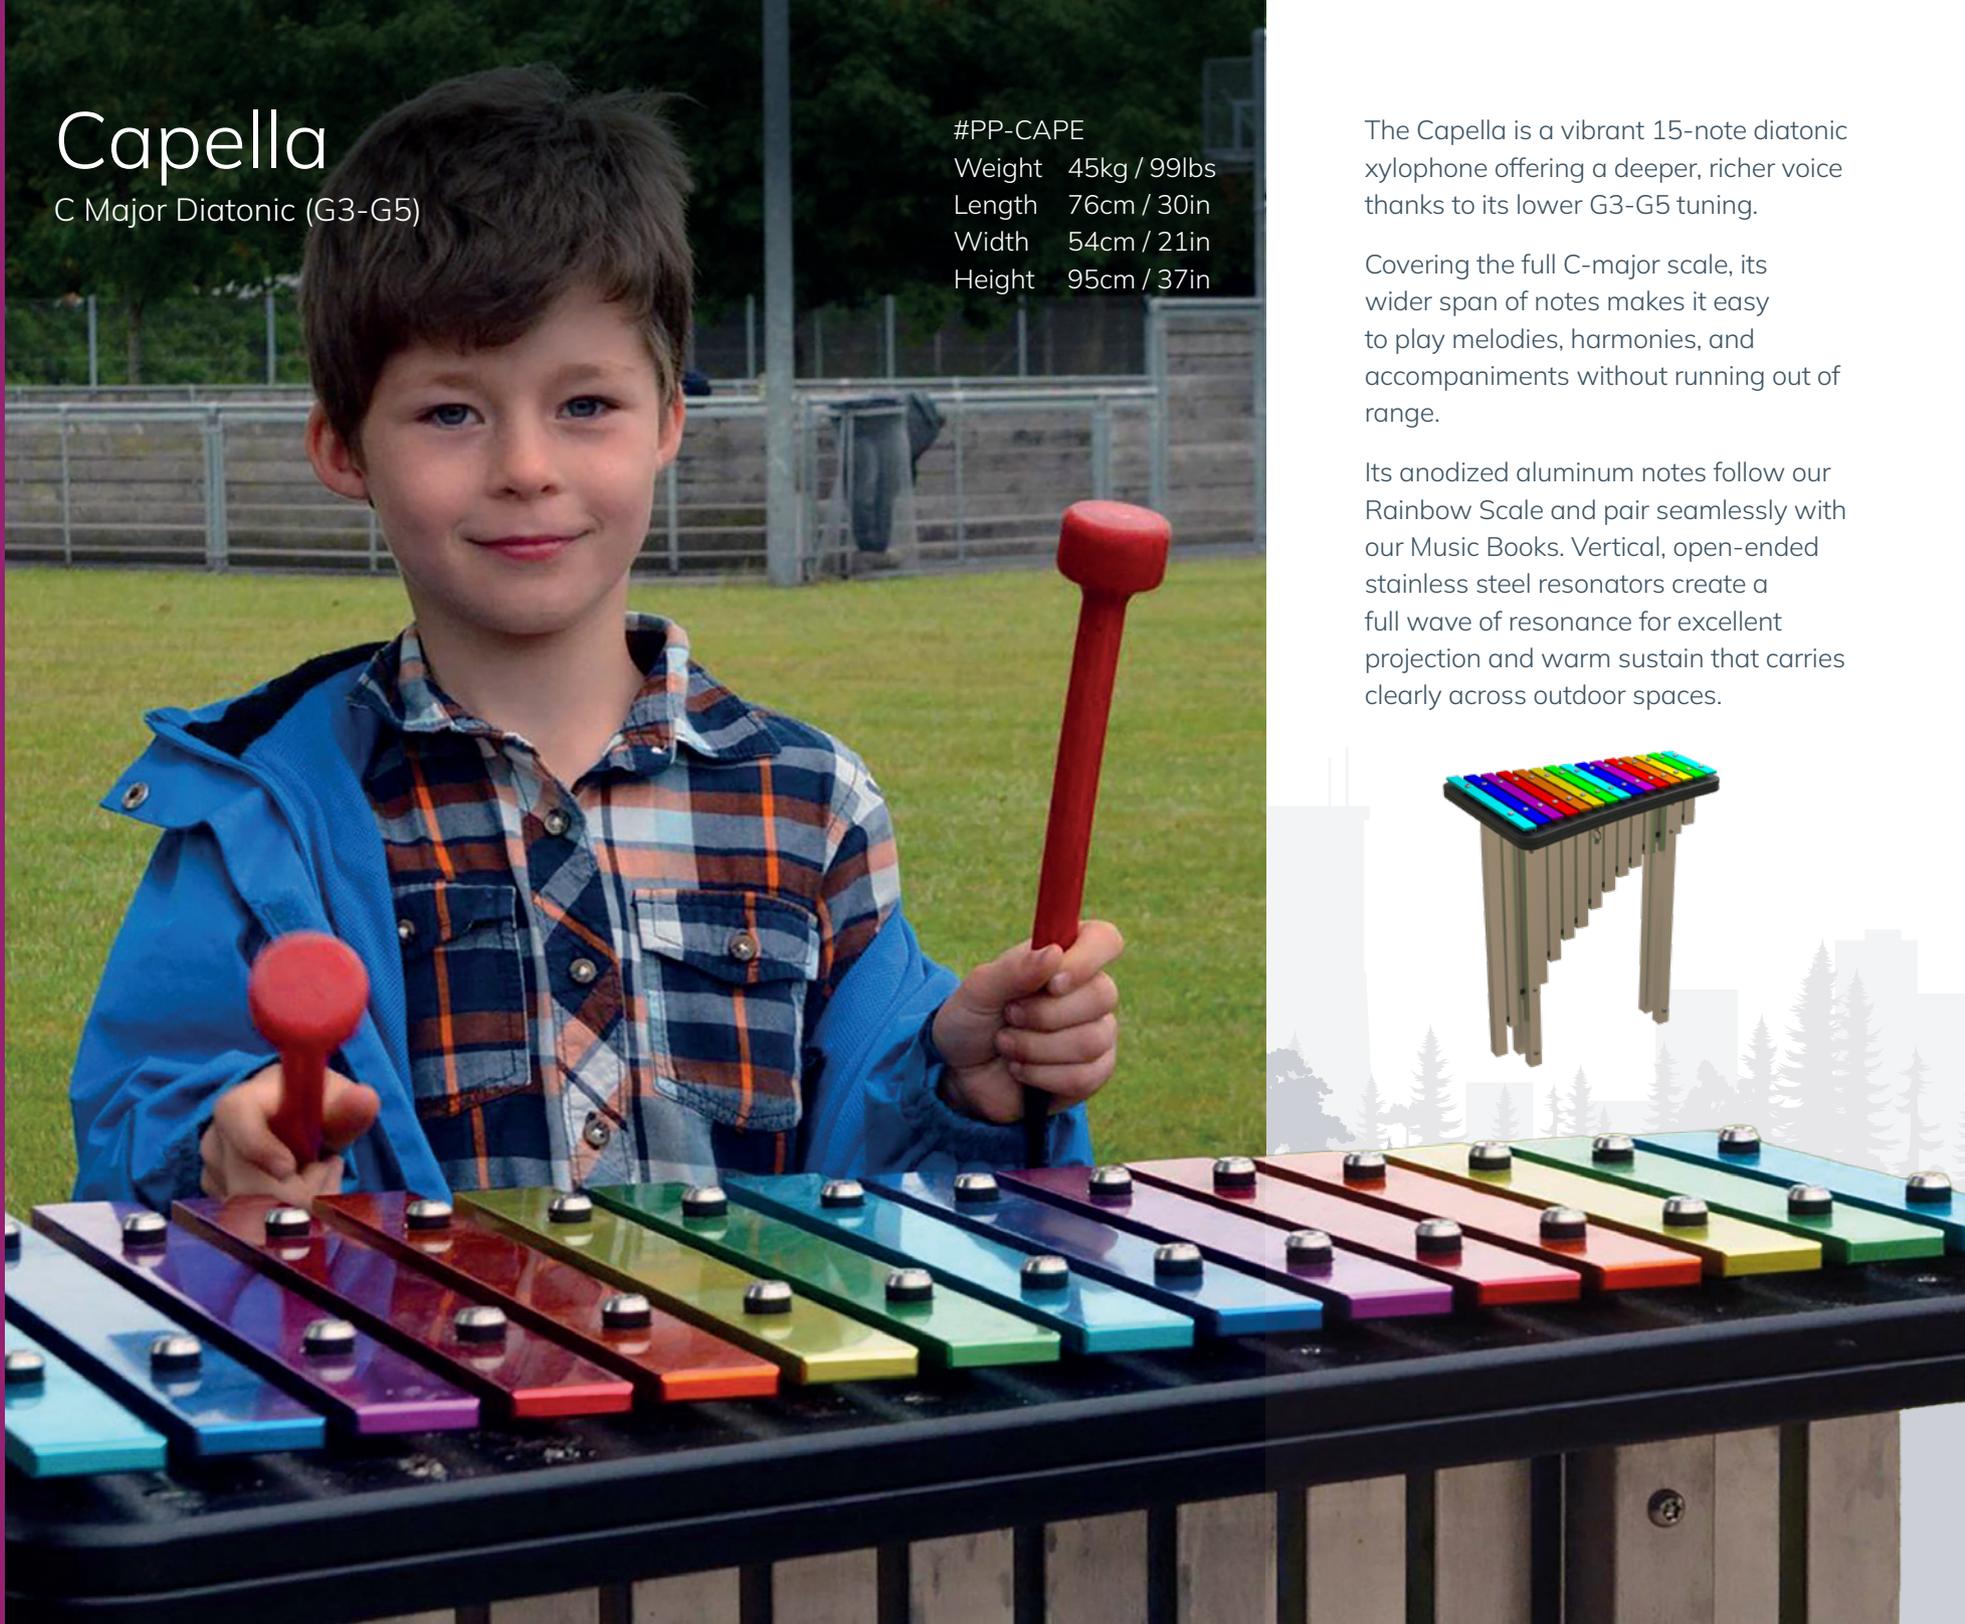

Width 54cm / 21in

Height 95cm / 37in

The Capella is a vibrant 15-note diatonic xylophone offering a deeper, richer voice thanks to its lower G3-G5 tuning.

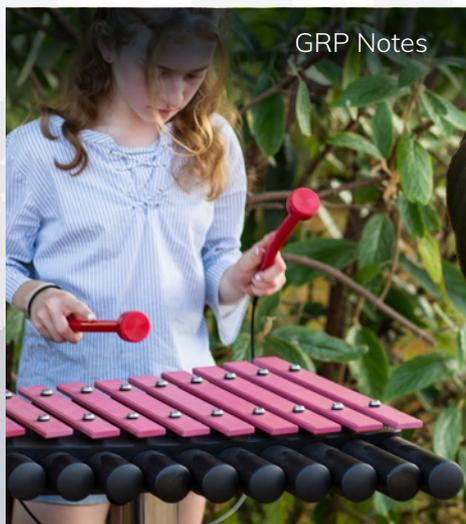

Covering the full C-major scale, its wider span of notes makes it easy to play melodies, harmonies, and accompaniments without running out of range.

Its anodized aluminum notes follow our Rainbow Scale and pair seamlessly with our Music Books. Vertical, open-ended stainless steel resonators create a full wave of resonance for excellent projection and warm sustain that carries clearly across outdoor spaces.

Compact and captivating, the Cadenza features a gently curved design with notes arranged in the familiar left-to-right xylophone layout. Tuned to a two-octave C-major pentatonic scale, it invites players to explore melody and rhythm with ease.

Standard aluminum notes deliver bright tones, while optional GRP notes in a purpleheart-wood color offer a distinctive alternative. Versatile and adaptable, the Cadenza can be ground fixed, surface mounted, or wall mounted to suit different spaces.

#PP-BLYR  
 Weight 25kg / 55lbs  
 Length 75cm / 30in  
 Width 24cm / 9in  
 Max Height 190cm / 75in

The Bell Lyre is an elegant sculptural instrument featuring eight graduated stainless steel bells in a graceful lyre-inspired frame.

The small bells at the top produce light tones that descend to the large, gong-like bells at the base, creating a soothing cascade of sound. The polished bells reflect their surroundings, forming a captivating focal point.

With simple single-post installation, the Bell Lyre is a calming, low-maintenance musical centerpiece for outdoor spaces.

Boscombe Pier

Tall, striking, and resonant, our Tubular Bells are a visual and sonic delight. Standing 5-7ft (1-2m) tall and made from 4-inch (100mm) aluminum tubes, they are tuned to a pentatonic scale and produce deep tones you can feel as well as hear.

Arrange all seven in a horseshoe to create an immersive sound experience with strong tactile feedback. A bold architectural feature, the Tubular Bells bring rich resonance and impact to any outdoor space.

Min Height	179cm / 70in
Max Height	249cm / 98in

Our Emperor Chimes are the ultimate statement in outdoor musical sculpture. Standing up to 8ft (2m) tall, these towering chimes are played entirely by hand - no mallets required.

A gentle touch produces soft, velvety tones with long sustain, while a firmer strike sends a satisfying vibration through the fingertips and palms. Available as a full pentatonic set of six or a harmonic triad, they bring sound, art, and sensory expression together in a deeply tactile way.

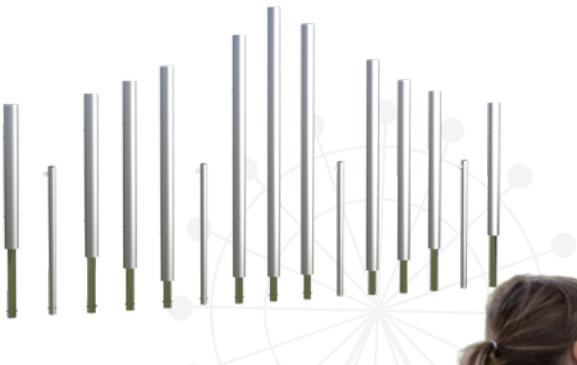

Colossus Chimes are a breathtaking sound sculpture designed for all ages. Featuring 11 towering chimes that combine the full pitch range of our Tubular Bells and Emperor Chimes, they deliver a dramatic, full-body musical experience.

Each chime offers commanding resonance that lingers long after being struck with the large mallets. Monumental in scale and presence, Colossus Chimes form a powerful focal point that invites awe and exploration in any outdoor space.

Freechimes are practical, durable, and stylish outdoor chimes with a beautiful tone and long sustain. Easy to install, play, and maintain, the pentatonic range is perfect for inclusive playgrounds, sensory gardens, and music therapy sessions.

With no wrong notes, striking the chimes produces a naturally calming melody that supports relaxed, confident play. Available in Soprano, Alto, and Symphony arrangements, these anodized-aluminum chimes engage players of all ages.

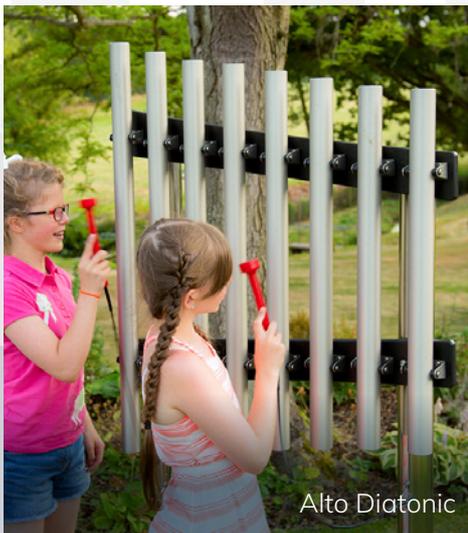

Soprano Pentatonic

Freechimes Diatonic arrangements are ideal for schools, outdoor classrooms, and building musical skills. Featuring accurately tuned anodized-aluminum notes, they offer a friendly introduction to melody-making in a fun, informal way.

Available in Soprano, Alto, and Symphony arrangements, they provide outstanding durability and resistance to weather and vandalism.

With options for in-ground, surface, or wall fixing, plus a notes-only format, they fit seamlessly into almost any setting.

# Harmony

C Major Pentatonic (C5-C7)

#PP-HARM	
Weight	22kg / 49lbs
Length	70cm / 28in
Width	89cm / 35in
Max Height	139cm / 55in

Inspired by the traditional Vietnamese bamboo T'rung, the Harmony features eleven thick anodized aluminum tubes arranged lengthwise and horizontally. Tuned to a C-major pentatonic scale, it produces sweet, uplifting tones with warm sustain.

Its upright layout encourages gentle, flowing movement and melodic play, making it especially engaging for seniors and therapeutic settings. Robust yet elegant, Harmony brings a soothing musical presence to outdoor spaces.

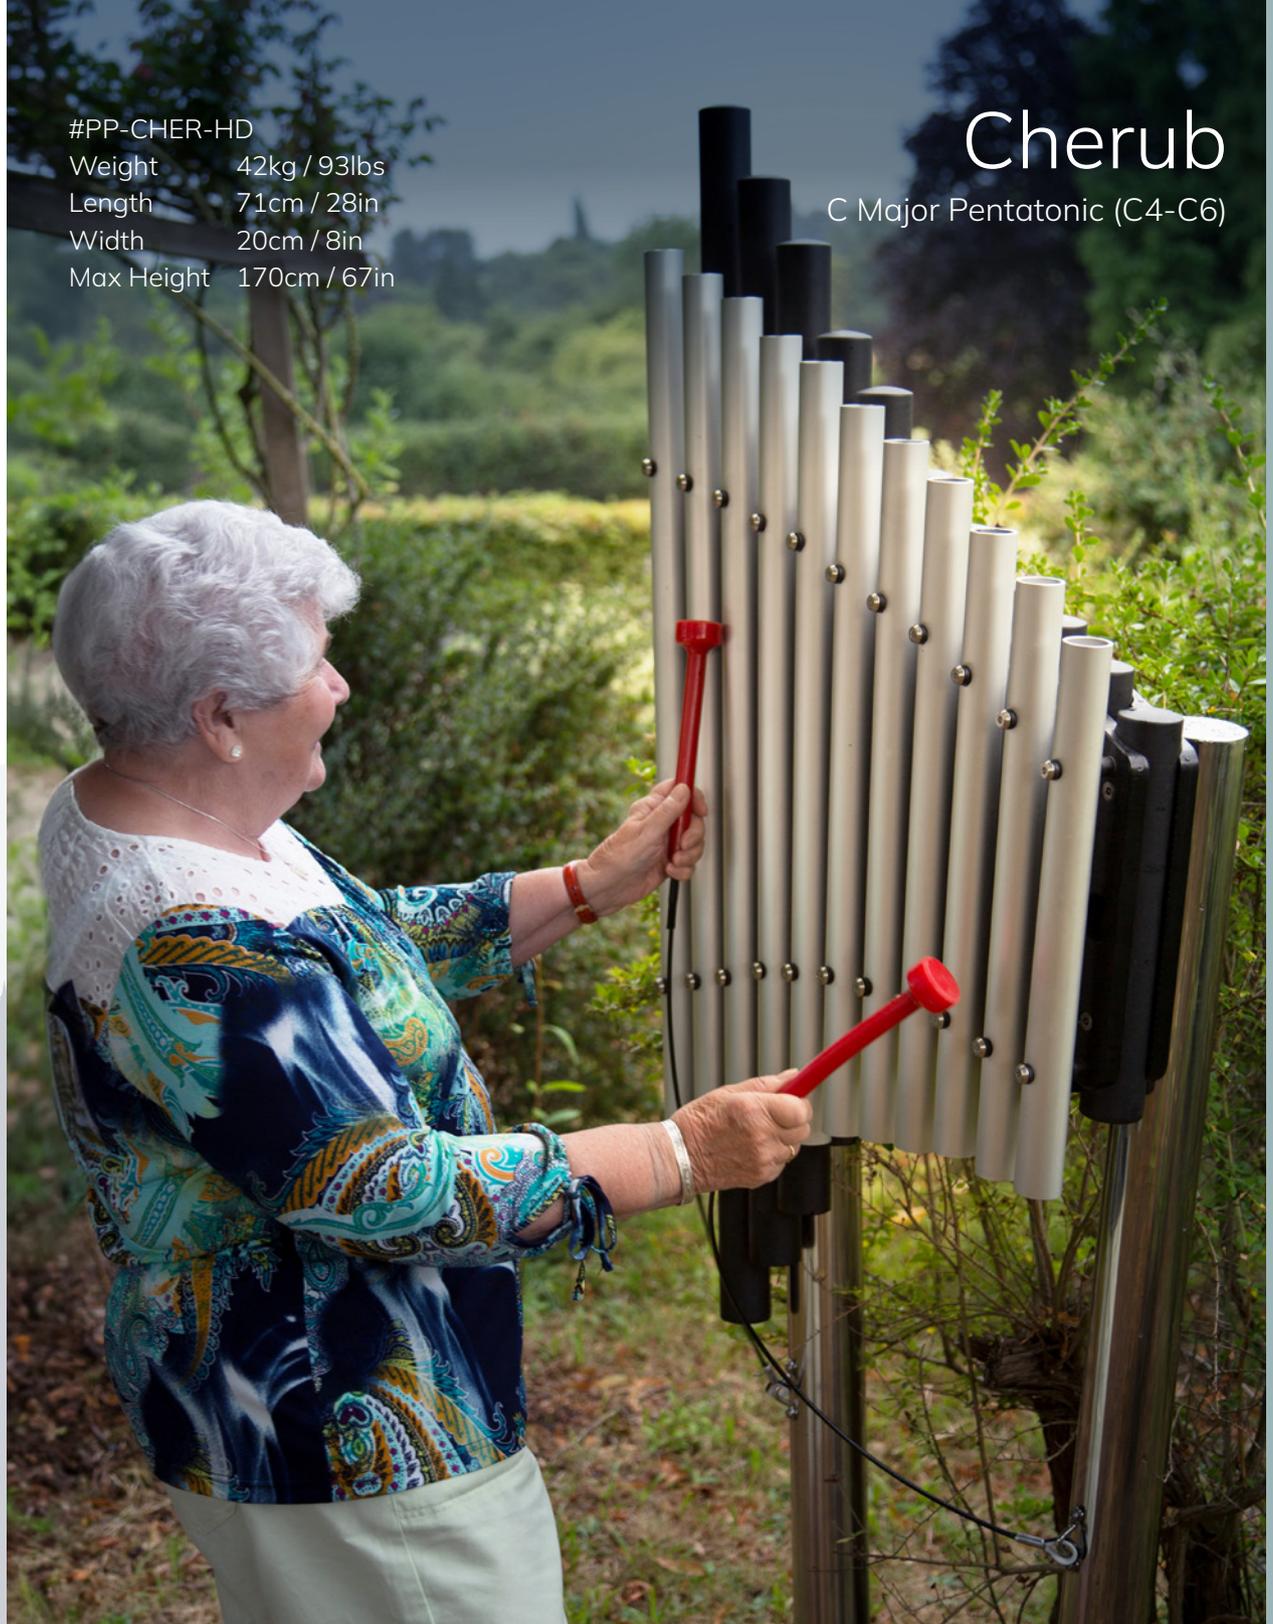

The Cherub features eleven hand-tuned anodized aluminum bells that produce clear, sustaining tones when struck with the attached mallets.

Tuned to a pentatonic scale, it offers a calming elegant sound ideal for sensory gardens and therapeutic spaces. Its vertical arrangement invites comfortable standing or seated play. With a quirky offset stance reminiscent of a wing, the Cherub can be ground, surface, or wall mounted to suit your space.

Length 118cm / 47in

Width 20cm / 8in

Height 170cm / 67in

The Sonora's 21 tubular bells produce a tone that is bright, clear, and resonant. Made from hand-tuned, heavy duty anodized aluminum, the Sonora can be wall-mounted or affixed to posts for easy installation in any location.

Its elegant shape, based on a wave effect, has a visual appeal that makes the Sonora ideal for use in attractions such as museums, zoos, and heritage sites as well as community projects or music therapy.

Named for its butterfly-like form, Papilio is a sculptural tubular-bell metallophone made from suspended anodized aluminum tubes supported by a robust stainless steel frame. Its wide, sweeping span allows up to four players to gather and create music together, making it ideal for multigenerational play. Tuned to a pentatonic scale with no wrong notes, Papilio offers clear tones that invite effortless collaboration in any outdoor setting.

Where music meets art, the Tutti is an eye-catching three-sided sound sculpture designed for shared play. Built around a single stainless steel post, it brings together three distinct note materials - aluminum, GRP, and hardwood-each with its own tone and character. Played alone or with others, these contrasting voices blend into one expressive “super instrument.” Sculptural and social, the Tutti creates a striking interactive focal point in outdoor spaces.

Mirror Chimes combine sound and visual interest, featuring polished stainless steel notes that reflect their surroundings and catch the light. Tuned to a pentatonic scale, they produce gentle, relaxing melodies suited to a wide range of environments. Their compact, wall-mounted design makes them ideal for courtyards, entranceways, and other space-limited areas. Durable and low-maintenance, Mirror Chimes add a modern musical touch to public spaces.

# MyTunes

Composed

Weight	Varies
Length	Varies
Width	8cm / 3in
Max Height	136cm / 54in

MyTunes offer a unique and engaging way to bring familiar melodies to outdoor spaces. Anodized aluminum notes are suspended between stainless steel posts and arranged sequentially so striking them in order plays a well-known tune. Choose from popular favorites or commission a custom melody tailored to your location, theme, or audience. From “The Star-Spangled Banner” to “Happy Birthday,” MyTunes make every visitor feel like a musician, with pricing based on the number of notes.

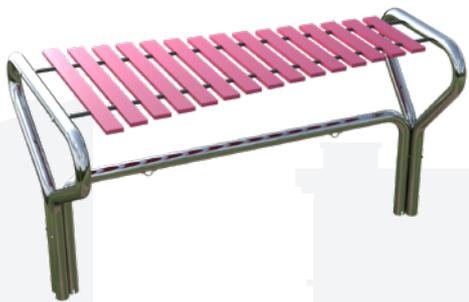

Marimbas bring a warm, mellow voice to outdoor music-making. Our outdoor Marimba invites up to four players to explore rich, creative music together. Its chunky GRP notes - resembling Purpleheart timber - produce a rounded, expressive tone ideal for improvisation.

Tuned diatonically, it delivers a smooth, welcoming sound that resonates beautifully in any outdoor space. Durable construction ensures reliable, long-lasting performance in parks, playgrounds, gardens, and woodland settings.

Our Tembos bring the vibrant character of plosive aerophones to outdoor music-making.

Players strike the open ends of tall stainless steel tubes with the paddles provided, sending a jolt of air through each pipe to create a bold, bouncing resonance. Their trunk-like form inspires the name Tembo, meaning “elephant” in Swahili.

Available in pentatonic, diatonic, and blues tunings, they invite easy improvisation. Supported in a contemporary frame and standing over 3m tall, Tembos offer a visually striking and irresistibly fun musical experience.

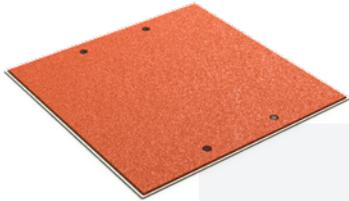

Town of Shaunavon

Stepping Stones bring a playful, musical surprise to walkways, plazas, sensory paths, and play areas. Each colorful square hides a triad chord beneath its surface, activated by a step, jump, wheel, or push. Players can uncover individual bells by shifting their weight or land with both feet to sound the full major or minor chord.

Using the same technology as our Floor Pianos, Stepping Stones produce pure tones with long sustain, sounding brighter the harder they're pressed. Available in six vibrant chord options or without the colored coating for seamless installation.

Harmony Hop transforms classic hopscotch into a musical, movement-led learning experience. Each square represents a note in the C-major scale, arranged to create three triad chords: C major, D minor, and E minor. As players hop, step, or wheel across the layout, they explore harmony, sequence, and pattern through play.

Flush-mounted and slip-resistant, Harmony Hop supports balance, coordination, and active learning while remaining fully wheelchair accessible. A lively, inclusive way to blend music theory with physical play.

Our Floor Pianos turn movement into music, inviting players to jump, step, wheel, or dance across the chromatic notes to create lively melodies. Installed flush to the ground, each piano uses sub-surface bells to produce clear, resonant tones with every press.

Available in two sizes - Grand for group play and Baby for compact spaces - they offer the same high-energy, inclusive experience and are fully wheelchair accessible. Built from heavy-duty stainless steel, Floor Pianos bring dynamic, collaborative play to parks, schools, and public spaces.

Weight 25kg / 55lbs

Length 20cm / 8in

Width 58cm / 23in

Height 120cm / 47in

Cyclone turns movement into sound, letting players create their own rainstorm by spinning the large wheel. As the bearings tumble inside, they produce shifting rain effects - from a soft patter to a swirling downpour - controlled by the speed of the spin.

The tactile wheel encourages strength, coordination, and an understanding of cause and effect. Its stainless steel frame and bold design make Cyclone a striking, durable feature for playgrounds, sensory paths, and inclusive outdoor spaces.

Tropical Cyclone brings rain-making play to younger children in a compact, colorful design. Turning the small wheel sends the internal bearings cascading to create gentle showers or lively bursts, offering an engaging way to explore sound and simple cause and effect.

Bright, friendly, and easy to use, it supports early gross motor skills and sensory development. Ideal for preschools, early-years areas, and accessible play spaces, Tropical Cyclone delivers calming, captivating rain sounds in a child-sized format.

Height	145cm / 57in

Inspired by East Asian slit-drum traditions, the Temple Block Tree brings bright, percussive energy to outdoor music-making. Its reinforced-polymer blocks, arranged in two branching tiers, graduate from low to high to create clear, hollow “pop” tones when struck with the mallets.

Players can explore different sounds by striking the tops or rims, discovering a range of lively effects. Supported by a polished stainless steel post, this nature-inspired instrument makes a striking standalone feature or a dynamic addition to any ensemble.

Talk Tubes bring playful communication to outdoor spaces, allowing children to talk, sing, or whisper through a stainless steel sound system that carries voices surprising distances.

They encourage social interaction, imaginative play, and early language development while demonstrating how sound travels. Each kit includes 40ft (12 m) of robust MDPE tubing, with optional extensions for longer runs, and features sound cones at two heights for inclusive access. A durable, low-maintenance choice for playgrounds, walkways, and sensory paths.

## Ensembles & Collections

Musical ensembles offer an effortless way to create complete outdoor music spaces. By combining instruments that naturally complement one another in tone, scale, accessibility, and visual appeal, our ensembles help designers, educators, and communities build harmonious, inclusive environments with confidence. They simplify early decision-making and ensure that every installation begins with a thoughtful musical foundation.

Each ensemble is curated to deliver a balanced soundscape where every instrument contributes something unique. Some collections are playful and inspired by nature, perfect for parks, trails, and sensory gardens; others are designed with outdoor classrooms in mind, supporting structured learning, rhythm work, and group activities. We also create ensemble options for therapeutic, senior-friendly, and intergenerational spaces, where gentle tones, ease of play, and calm interaction are key. For street and urban environments, we offer bold, durable groupings chosen for their strong visual presence and long-lasting performance.

For landscape architects and specifiers, ensembles offer ready-made groupings with compatible footprints, materials, and heights. They streamline conversations around layout, accessibility, and budgeting, while ensuring the final installation will be musically satisfying and visually cohesive. With clear component lists and flexible fixing options, they also make it easier to integrate musical play into wider landscape plans.

Ensembles also create instant impact. Their coordinated colors, tunings, and forms transform playgrounds, community spaces, healthcare settings, and public areas into vibrant, welcoming musical destinations. Whether arranged as a focal point or woven through a wider landscape, they draw people in and encourage shared, joyful interaction.

This catalog features a selection of our most popular ensembles, but many more configurations - including bespoke arrangements - are available on our website. Whatever your project, our ensembles provide a beautifully balanced foundation for joyful, inclusive outdoor music-making that grows with the needs of your community.

# Rainbow Trio

C5 -C6

The Rainbow Trio Ensemble offers a bright, engaging introduction to music for young children while also proving popular in senior centres and family attractions. Compact yet full of character, it pairs Rainbow Chimes, Rainbow Metallophone, and Rainbow Bongos to create an easy, rewarding mix of melody and rhythm. Pentatonic tuning ensures every note works together, supporting confident, playful music-making. Durable, colorful, and budget-friendly, it's ideal for small spaces seeking inclusive, multigenerational musical fun indoors or out.

NEW  
FOR  
2026

The Rainbow Quartet Ensemble expands on the much-loved Rainbow Trio, adding the Tropical Cyclone to create a vibrant blend of melody, rhythm, and playful rain-like sound effects.

Compact, colorful, and welcoming, it features Rainbow Chimes, Rainbow Metallophone, Rainbow Bongos, and Tropical Cyclone - perfect for encouraging creative, collaborative play in small outdoor spaces. Pentatonic tuning keeps music intuitive for young children, while its lively tones and tactile elements make it a hit in family attractions, playgrounds, and community areas. Durable, low-maintenance, and budget-friendly, the Quartet brings joyful group music to any setting.

NEW  
FOR  
2026

The Rainbow Quintet Ensemble brings five vibrant instruments together to create a rich, engaging soundscape for collaborative play. Featuring Rainbow Chimes, Rainbow Metallophone, Rainbow Bongos, Tropical Cyclone, and Calypso Chimes, it can accommodate around 10-14 players at once - perfect for larger groups and lively community settings.

Pentatonic tuning keeps music intuitive for young children, while the colorful, durable design makes it a favorite in playgrounds, parks, and shared outdoor spaces. Low-maintenance and uplifting, the Quintet delivers inclusive, multigenerational music-making for all ages.

# Soprano Quartet

C4-C6

The Soprano Quartet Ensemble is a popular choice for schools and learning environments, offering a compact yet high-impact mix of untuned and pentatonic instruments. Featuring the Cadenza, Small Babel Drum, Soprano Pentatonic Freechimes, and Medium Congas, it spans two octaves from C4-C6 and supports 4-6 players at once.

Melodic, rhythmic, and soothing elements blend effortlessly, creating an instantly harmonious experience. Durable, inclusive, and space-efficient, this quartet delivers excellent value and engaging group play for all ages.

# Alto Quartet

C3-C6

The Alto Quartet Ensemble is a larger companion to our Soprano Quartet, designed for projects with more space and a wider musical brief. Combining the Duo, Emperor Chimes (3), Alto Diatonic Freechimes, and Congas Trio, it offers an impressive blend of pentatonic and diatonic sounds that support rich, harmonious group play.

Suitable for 6-8 players, this ensemble delivers bright melody, deep resonance, and lively rhythm in a layout flexible enough to install as one feature or divided into smaller musical zones. Durable, inclusive, and ideal for busy public spaces, the Alto Quartet brings bold musical impact to any outdoor setting.

# Street Quartet

A4-A5

The Street Quartet Ensemble is built for the toughest urban environments, delivering bold, characterful sound in high-traffic public spaces. Featuring the Large Babel Drum, Handpipes, Emperor Chimes, and Cajon, it offers a wide mix of tones - all designed to be played with the hands for easy, spontaneous interaction.

Crafted from 316 stainless steel, aluminum, and HDPE, the ensemble is highly durable, low-maintenance, and vandal-resistant. Ideal for parks, plazas, and city streets, the Street Quartet brings accessible, hands-on music-making to vibrant urban settings.

# Inspired By Nature

A3-A5

The Inspired by Nature Ensemble offers a charming trio of floral and woodland-themed instruments that bring gentle musical magic to outdoor spaces. Featuring the Sunflower Petal Drum, Harmony Bells (Minor Bunch), and Liberty Bells, this compact collection creates a warm, melodic soundscape ideal for parks, playgrounds, and inclusive playscapes.

Accommodating 7-8 players, the trio encourages interaction, creativity, and sensory engagement within a small footprint. With its durable, nature-inspired design, it adds a joyful, harmonious presence to any outdoor environment.

# Inspired By Nature Hexad

A3-A5

NEW  
FOR  
2026

The Inspired by Nature Hexad Ensemble brings the colors, shapes, and rhythms of the natural world to life through six beautifully themed instruments.

Featuring Harmony Bells (Minor Bunch), Liberty Bells, Sunflower Petal Drum, Dragonfly, Bug Beats (Flower Beetle), and Bumblebee, it creates a vibrant, layered soundscape that encourages sensory exploration, creativity, and joyful group interaction.

Blending seamlessly into pollinator gardens, sensory trails, botanical spaces, and outdoor learning environments, the Hexad's natural forms and bright colors invite touch, movement, and curiosity. With room for 8–10 players at once, it is perfect for collaborative music-making, group sessions, and inclusive play.

The contrasting tones of the Sunflower Petal Drum and Bug Beats add rhythmic width alongside the melodic voices of the bells and chimes, creating an engaging mix of sounds. The ensemble also supports STEAM-based activities, helping learners explore patterns, pitch, symmetry, and natural design through hands-on musical play.

Encouraging teamwork, communication, and shared discovery, the Hexad offers a rich, multisensory experience that brings people together - celebrating music, nature, and creativity in outdoor spaces.

# Drum Circle

Unpitched Percussion

The Drum Circle Ensemble creates an energetic hub for rhythm, connection, and group play. Featuring Street Congas (Duo and Trio), a pair of Tumbadoras, and a trio of Djembes, it offers a powerful mix of tones that invites spontaneous participation from players of all ages. Suitable for 4-10 players, the layout can be arranged in a circle or adapted to parks, plazas, and urban spaces.

Built from heavy-duty stainless steel, this robust, low-maintenance ensemble is ideal for high-traffic settings, bringing people together through the shared beat of outdoor percussion.

## Music That Lives On

*'Joyful spaces that honour life, connection and community'*

Outdoor musical memorials offer a beautiful way to celebrate someone special - not through silence, but through sound, creativity and shared experiences. These installations become living tributes: places where memories are felt, where people gather, and where joy continues in every note.

Placed in gardens, parks, school grounds or community spaces, memorial instruments bring people together in meaningful, uplifting ways. Each piece can be personalised with complimentary engraving, creating a heartfelt legacy for families and communities to share.

## What Families & Communities Say

*"The drum circle has flourished over this past year. We've witnessed so many joyful moments - people of all ages coming together to create music, share experiences and build connections through rhythm."*

*"Choosing the instruments for Calum's Cabin has been the best part of the last few months. They are beautiful, and the inscription on the drum is perfect. When families arrive, the first thing they do is run outside to play. Donald would have loved that."*

*"It's unique. It stands out. It will draw people to the gardens, which are already a wonderful part of our community. The name Harmony Gardens brings a continuity to what the Memorial Gardens are. It's bringing more people in - and that perfect harmonious sound for such a quiet, peaceful place."*

These experiences remind us that musical memorials are not only tributes to the past - they create joy, comfort and connection in the present, and continue to inspire long into the future.

## A Legacy of Sound & Light

Music brings people together. Your memorial can too.

““

*We loved collections from Percussion Play as we wanted something vibrant to draw people in. The Rainbow Collection fits that focus, particularly the Calypso Chimes and Rainbow Chimes. It's also great how natural the instruments felt. Being inspired by nature was important to us, which is why we chose the Harmony Flowers.* ””

Emily Sitzes, Director of Community Wellness,  
Laclede Groves Lutheran Senior Services Community  
Webster Groves, Missouri, USA

““

*Outdoor musical instruments from Percussion Play have been an instant hit with patrons of all ages when installed in the grounds of our new building. From spontaneous 'concerts' to a simple tap of delight on a drum, they've brought a wonderful sense of joy to the community.* ””

Missy Derabertis, Head of Pre-School,  
Upland Country Day School,  
Chester County, Pennsylvania, USA

““

*Students love having several friends playing different instruments at the same time. They often run from one to another, collaborating or taking time to create music on their own. These instruments affirm the love of music in the Bee School. They bring joy and sound to our campus.* ””
